BioScience Laboratories Announces Testing Capabilities To Support Approved Health Canada Guidance Document For Human-Use Antiseptic Drugs

Bozeman, Montana, December 29, 2009 — BioScience Laboratories announces efficacy and safety testing capabilities to support Health Canada's guidance document *Human-Use Antiseptic Drugs* finalized on December 2, 2009. BioScience Laboratories actively participated in the development and revision of this document. The organization's Clinical and In-Vitro laboratories have the training and experience to conduct the testing methods in accordance with CEN, ASTM, and ICH guidelines, as required in this document to show product efficacy and safety. BioScience Laboratories' GCP and GLP compliant quality system ensures that the testing documentation generated will meet Health Canada's requirements for submission to support product efficacy and safety claims.

For more information on BioScience Laboratories' capabilities to perform the testing outlined in the Health Canada *Human-Use Antiseptic Drugs* guidance document, contact:
